

A-E2LCD-2 with rugged handle & hardwire connector

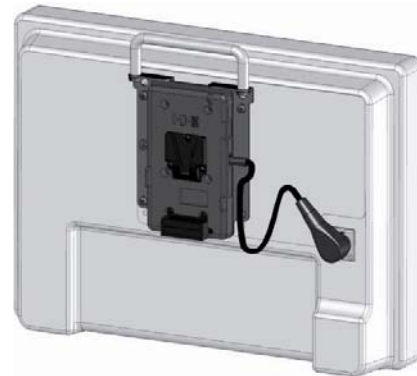

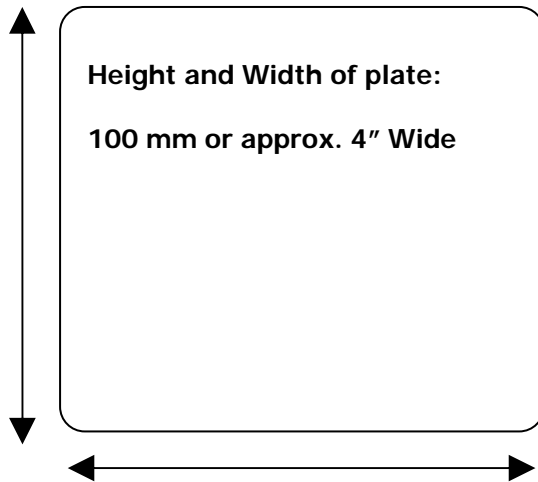

The A-E2LCD-2 battery adaptor can be mounted on all VESA 100 compliant LCD monitors.

VESA 100 compliant products are equipped with a 100 x 100 mm mounting screw pattern in a physical plate configuration similar to the dimensional example below in Figure 1.

Please note the A-E2LCD-2 is not compatible with VESA 75 and VESA 200 size mounting patterns.

This mount provides DC current directly from the battery to the 4-pin XLR connector (female). The A-E2LCD-2 works with video monitors and other equipment that handles a voltage range from 11–17V.
